

GameDay StatVision – Revision History:

Version 2.3.6.0

Release Date: July 29, 2022

Description

1. Automatically drop the leading '+' in ERTD output for a team if more than 9.5 games ahead in wild card. For example, "+10.0" will output as "10.0" since the field must not exceed four characters.
-

Version 2.3.5.0

Release Date: March 25, 2022

Description

1. Updates to support name change for the Cleveland Guardians
-

Version 2.3.4.0

Release Date: February 26, 2020

Description

1. Updated WHIP and ERA stats to show a leading 0 when less than 1
-

Version 2.3.3.0

Release Date: July 7, 2017

Description

1. OBP was including Sac hits in denominator. Fixed.
-

Version 2.3.2.0

Release Date: March 27, 2017

Description

1. Fixed encoding of Color RTD
-

Version 2.3.1.0

Release Date: March 17, 2015

Description

1. Highlights/Color RTD the MLB affiliate teams for MiLB teams in the game for standings and leaders. The affiliate colors are the same as the MiLB teams.
-

Version 2.3.0.0

Release Date: February 4, 2013

Description

1. Added the suck-up feature for wildcard standings.
-

Version 2.2.1.0

Release Date: April 19, 2012

Description

1. Changed the bitmaps for Miami and Toronto.
2. Bug Fix: The order of teams was not being updated when editing the standings.
3. Bug Fix: The group box text for the Stat Button Order dialog was visible.
4. Bug Fix: The Selected Frame and Play Number of Times was never implemented.

Version 2.2.0.0

Release Date: March 12, 2012

Description

1. Signs can now be assigned drive letter(s) to assist with the dual channel support in DCGI.
2. The user can update all standings. The standings will also update when GameDay is used to pull the latest data from the ftp site.
3. The play sequence commands are also sent over the DMP-8000 control port (27000).
4. Bug Fix: The checksums were not being calculated correctly for Elias Messages and non-updating messages when the output was set to uppercase.

Version 2.1.2.0

Release Date: March 14, 2011

Description

1. Responses from a display controller are handled on a separate thread so execution doesn't stop on the wait.
2. Bug Fix: Clicking a script button would stop the running playlist.
3. Removed the requirement that the sequence has to be configured to send standings and leaders data.

Version 2.1.0.0

Release Date: March 16, 2009

Description

1. Added non-updating categories to the batter and pitcher tabs. These categories will be static for the whole game and can only be shown one at a time.
2. Added Elias Messages that are non-updating categories that don't fit the 1 category 3 stat template. These can be shown like any other messages.
3. The StatVision Stats output was changed so the player's bio information is only sent once instead of with each category.
4. Added <PB> (Page Break), <Abbr>, <City>, and <Nick> holders for the category title configurations.
5. Added Delete buttons for the player messages.

Version 2.0.4.0

Release Date: Sept 5, 2008

Description

1. Bug Fix: Couldn't modify the last division for a league in Category Titles.
2. Update mode set to 0 so the sequence will have to change before the data will change on the display.
3. Bug Fix: If the teams weren't being highlighted it wouldn't replace the last leader with a home town player.
4. Bug Fix: If a home player was already in the top of the list it would still replace the last leader.

Version 2.0.3.0

Release Date: July 21, 2008

Description

1. Too much processor time was being taken up by StatVision.
2. Bug Fix: When a long script was being played there wasn't a way to stop it. Now only one script can run at a time and the latest one will stop the previous one.

Version 2.0.2.0

Release Date: July 15, 2008

Description

1. When the home team is tied in the standings they will be listed first.
2. Bug Fix: The standings were not being sorted correctly.

Version 2.0.0.0

Release Date: July 11, 2008

Description

1. Added the pregame tab.

Version 1.2.0.0

Release Date: March 10, 2008

Description

1. Bug Fix: The batter wasn't updating during play.
2. When the DakStats Baseball game is set for post-season the Elias stats in StatVision will not be updated.
3. Modified the Script buttons dockable window to hold the script buttons and the new stat buttons. The stat buttons allow a user to setup a button to show certain stats within certain categories with one press of a button.

Version 1.1.0.0

Release Date: July 6, 2007

Description

1. Added script buttons.
2. The signs were saved in a wrong format. This is going to cause the user to have to re-enter the sign configuration when this version is installed.
3. The manual and quick start guide can be viewed using Adobe Acrobat through the software.

Version 1.0.1

Release Date: March 27, 2007

Description

1. Bug Fix: The category text with stats was not being updated properly.
2. Waits for all updates from DakStats before trying to access the database to get the data for the updates.
3. Bug Fix: Double Headers were not being handled properly with starting and relief pitching.
4. Bug Fix: External files were not being verified that they exist before being used.

Version 1.0.0

Release Date: March 12, 2007

Description

1. Initial Release:
Includes the Configurations, Ingame Tab, Field, Player Messages, Quick Message, Batting Tab, Pitching Tab, and Category Specifics.
-
